

HDPE CP08949

Overview

HDPE CP08949 is a high molecular weight, high density polyethylene copolymer with broad, bimodal molecular weight distribution. Typical applications are non-pressure-rated pipes produced by corrugation or profile wall extrusion. HDPE CP08949 should not be used in smooth wall pipes that will contain fluids at pressures above ambient.

Property	Value	Unit	ASTM
Melt index (condition 230°C/2.16 kg)	8	g/10 min	D 1238
Density (g/cm ³)	0.949	g/cm ³	D 792
